PROFILE

Energetic and results-focused full-stack developer, with expertise in back-end and front-end development. I pride myself on writing clear, maintainable code using modular components, primarily in Ruby on Rails and React.js. I am eager to advance my professional journey by contributing my knowledge and skills to a role within an innovative organization.

PROFESSIONAL EXPERIENCE

Freelance Web App Developer

Oct 2023 – present | Montreal, Canada

LetsDish.io

Designed and built feature-rich web app with the goal of improving safety and transparency in online dating.

- Collaborated with client to determine project scope and requirements.
- Designed and developed new features using HTML, CSS, JavaScript, and Ruby on Rails.
- Deployed and provided ongoing maintenance and support.

Freelance Web Store Developer

Jan 2023 – present | Montreal, Canada

Cafe Pista

Designed and built a Shopify web store incorporating existing Shopify themes and plugins, but with the addition of several custom components.

- Collaborated with client and team members to determine project scope and requirements.
- Improved sales by 15% and conversion rate by 11% with more approachable and user friendly web store.
- Implemented wholesale and subscription services.

Pastry Chef

Mar 2020 – Oct 2022 | Montreal, Canada

Cafe Pista

- Improved efficiency and reduced waste by up to 20% through development of an automated and user friendly system for tracking billing, food cost, waste, and designing new menu items.
- Developed pastry program that now supplies all 3 Cafe Pista locations.
- Managed kitchen staff, clients, and suppliers.
